**Paper 3: Statistics and Mechanics Mark Scheme** 

| Question   | Scheme   | Marks | AOs    |
|------------|--|-------|--------|
| 1(a)       | Area = $8 \times 1.5 = 12 \text{ cm}^2$ Frequency = $8 \text{ so } 1 \text{ cm}^2 = \frac{2}{3} \text{ hour (o.e.)}$ | M1    | 3.1a   |
|            | Frequency of 12 corresponds to area of 18 so height = $18 \div 2.5 = 7.2$ (cm)                                       | A1    | 1.1b   |
|            | Width = $5 \times 0.5 = 2.5$ (cm)  | B1cao | 1.1b   |
|            |  | (3)   |        |
| (b)        | $[\bar{y} =] \frac{205.5}{31} = \text{awrt } 6.63$   | B1cao | 1.1b   |
|            | $\left[\sigma_{y}=\right]\sqrt{\frac{1785.25}{31}-\bar{y}^{2}} = \sqrt{13.644641} = \text{awrt } 3.69$               |       |        |
|            |  | M1    | 1.1a   |
|            | allow $[s=] \sqrt{\frac{1785.25 - 31\overline{y}^2}{30}} = \text{awrt } 3.75$  | A1    | 1.1b   |
|            |  | (3)   |        |
| (c)        | Mean of Heathrow is higher than Hurn and standard deviation smaller suggesting Heathrow is more reliable             | M1    | 2.4    |
|            | Hurn is South of Heathrow so does <u>not</u> support his belief  | A1    | 2.2b   |
|            |  | (2)   |        |
| (d)        | $\overline{x} + \sigma \approx 10.3$ so number of days is e.g. $\frac{(11 - "10.3")}{3} \times 8 (+5)$               | M1    | 1.1b   |
|            | = 6.86 so <b>7 days</b>  | A1    | 1.1b   |
|            |  | (2)   |        |
| (e)        | [ $H = \text{no. of hours}$ ] $P(H > 10.3)$ or $P(Z > 1) = [0.15865]$  | M1    | 3.4    |
|            | Predict $31 \times 0.15865 = 4.9 \text{ or } 5 \text{ days}$   | A1    | 1.1b   |
|            |  | (2)   |        |
| <b>(f)</b> | (5 or) 4.9 days < (7 or) 6.9 days so model may <b>not</b> be suitable  | B1    | 3.5a   |
|            |  | (1)   |        |
|            |  | (13 n | narks) |

| Ques        | tion 1 continued  |
|-------------|---|
| Note        | s:  |
| (a)         |   |
| M1:         | for clear attempt to relate the area to frequency. Can also award if        |
|             | their height $\times$ their width = 18                                      |
| A1:         | for height = $7.2$ (cm)   |
| (b)         |   |
| M1:         | for a correct expression for $\sigma$ or $s$ , can ft their value for mean  |
| A1:         | awrt 3.69 (allow $s = 3.75$ )   |
| (c)         |   |
| M1:         | for a suitable comparison of standard deviations to comment on reliability. |
| A1:         | for stating Hurn is south of Heathrow and a correct conclusion              |
| (d)         |   |
| M1:         | for a correct expression – ft their $\bar{x} + \sigma \approx 10.3$         |
| A1:         | for 7 days but accept 6 (rounding down) following a correct expression      |
| (e)         |   |
| <b>M1</b> : | for a correct probability attempted   |
| A1:         | for a correct prediction  |
| (f)         |   |
| B1:         | for a suitable comparison and a compatible conclusion                       |

| Question              | Scheme   | Marks | AOs      |
|-----------------------|--|-------|----------|
| 2(a)                  | e.g. It requires extrapolation so will be unreliable (o.e.)  | B1    | 1.2      |
|                       |  | (1)   |          |
| (b)                   | e.g. Linear association between $w$ and $t$  | B1    | 1.2      |
|                       |  | (1)   |          |
| (c)                   | $H_0: \rho = 0  H_1: \rho > 0$   | B1    | 2.5      |
|                       | Critical value 0.5822  | M1    | 1.1a     |
|                       | Reject H <sub>0</sub>  |       |          |
|                       | There is evidence that the product moment correlation coefficient is greater than 0  | A1    | 2.2b     |
|                       |  | (3)   |          |
| (d)                   | Higher $\bar{t}$ suggests overseas and not Perthlower wind speed so perhaps not close to the sea so suggest <b>Beijing</b> | B1    | 2.4      |
|                       |  | (1)   |          |
|                       |  | (     | 6 marks) |
| Notes:                |  |       |          |
| (a)<br>B1: for        | a correct statement (unreliable) with a suitable reason  |       |          |
| (b)                   |  |       |          |
| B1: for               | a correct statement  |       |          |
| (c)                   |  |       |          |
|                       | both hypotheses in terms of $\rho$   |       |          |
|                       | selecting a suitable 5% critical value compatible with their H <sub>1</sub>  |       |          |
|                       | a correct conclusion stated  |       |          |
| (d)<br><b>B1:</b> for | suggesting Beijing with some supporting reason based on $t$ or $w$   |       |          |

Allow Jacksonville with a reason based just on higher  $\bar{t}$ 

| Question | Scheme   | Marks | AOs      |
|----------|--|-------|----------|
| Q3(a)    | 49 50.75   |       |          |
|          | P(L > 50.98) = 0.025   | Blcao | 3.4      |
|          | $\therefore \frac{50.98 - \mu}{0.5} = 1.96$  | M1    | 1.1b     |
|          | $\therefore  \mu = 50$   | Alcao | 1.1b     |
|          | P(49 < L < 50.75)  | M1    | 3.4      |
|          | = 0.9104 awrt <b>0.910</b>   | A1ft  | 1.1b     |
|          |  | (5)   |          |
| (b)      | $S =$ number of strips that cannot be used so $S \sim B(10, 0.090)$                              | M1    | 3.3      |
|          | $= P(S \le 3) = 0.991166$ awrt 0.991   | A1    | 1.1b     |
|          |  | (2)   |          |
| (c)      | $H_0: \mu = 50.1$ $H_1: \mu > 50.1$  | B1    | 2.5      |
|          | $\overline{X} \sim N\left(50.1, \frac{0.6^2}{15}\right)$ and $\overline{X} > 50.4$               | M1    | 3.3      |
|          | $P(\bar{X} > 50.4) = 0.0264$   | A1    | 3.4      |
|          | p = 0.0264 > 0.01 or $z = 1.936 < 2.3263$ and not significant                                    | A1    | 1.1b     |
|          | There is insufficient evidence that the <u>mean length</u> of strips is <u>greater than 50.1</u> | A1    | 2.2b     |
|          |  | (5)   |          |
|          |  | (12   | 2 marks) |

# **Question 3 continued**

### Notes:

(a)

1st M1: for standardizing with  $\mu$  and 0.5 and setting equal to a z value (|z| > 1)

2<sup>nd</sup> M1: for attempting the correct probability for strips that can be used

**2<sup>nd</sup> A1ft:** awrt 0.910 (allow ft of their  $\mu$ )

**(b)** 

M1: for identifying a suitable binomial distribution

A1: awrt 0.991 (from calculator)

(c)

**B1:** hypotheses stated correctly

M1: for selecting a correct model (stated or implied)

1st A1: for use of the correct model to find p = awrt 0.0264 (allow z = awrt 1.94)

2<sup>nd</sup> A1: for a correct calculation, comparison and correct statement

3<sup>rd</sup> A1: for a correct conclusion in context mentioning "mean length" and 50.1

| Question | Scheme   | Marks | AOs  |
|----------|--|-------|------|
| 4(a)     | $P(A'   B') = \frac{P(A' \cap B')}{P(B')} \text{ or } \frac{0.33}{0.55}$   | M1    | 3.1a |
|          | $=\frac{3}{5}$ or 0.6  | A1    | 1.1b |
|          |  | (2)   |      |
| (b)      | e.g. $P(A) \times P(B) = \frac{7}{20} \times \frac{9}{20} = \frac{63}{400} \neq P(A \cap B) = 0.13 = \frac{52}{400}$<br>or $P(A' \mid B') = 0.6 \neq P(A') = 0.65$ | B1    | 2.4  |
|          |  | (1)   |      |
| (c)      |  | B1    | 2.5  |
|          | В  | M1    | 3.1a |
|          | A C  | A1    | 1.1b |
|          | 0.22 (0.13) 0.23 (0.09) 0.11   | M1    | 1.1b |
|          |  | A1    | 1.1b |
|          |  | (5)   |      |
| (d)      | $P(B \cup C)' = 0.22 + 0.22 \text{ or } 1-[0.56]$<br>or $1-[0.13+0.23+0.09+0.11]$ o.e.   | M1    | 1.1b |
|          | = 0.44   | A1    | 1.1b |
|          |  | (2)   |      |

(10 marks)

### **Notes:**

(a)

M1: for a correct ratio of probabilities formula and at least one correct value.

**A1:** a correct answer

(b) for a fully correct explanation: correct probabilities and correct comparisons.

(c)

**B1:** for box with B intersecting A and C but C not intersecting A.( Or accept three intersecting circles, but with zeros entered for  $A \cap C$  and  $A \cap B \cap C$ )No box is B0

**M1:** for method for finding  $P(B \cap C)$ 

**A1:** for 0.09

M1: for 0.13 and their 0.09 in correct places and method for their 0.23

A1: fully correct

(d)

**M1:** for a correct expression – ft their probabilities from their Venn diagram.

A1: cao

|          |   | (3)   |      |
| (d)      | Use of $\mathbf{v} = \mathbf{u} + \mathbf{a}t$ : $\mathbf{v} = 0.6\mathbf{j} + (0.7\mathbf{i} - 0.1\mathbf{j}) t$ | M1    | 3.1b |
|          | Equating the i and j components of v  | M1    | 3.1b |
|          | t = 0.75  | A1 ft | 1.1b |
|          |   | (3)   |      |

(10 marks)

### **Notes:**

(a)

M1: for use of  $\mathbf{v} = \mathbf{u} + \mathbf{a}t$ 

**A1:** for given answer correctly obtained

**(b)** 

M1: for use of  $\mathbf{r} = \mathbf{u}t + \frac{1}{2}\mathbf{a}t^2$ 

A1: for a correct expression for  $\mathbf{r}$  in terms of t

(c)

M1: for equating the i and j components of their r

A1ft: for a correct equation following their  $\mathbf{r}$ 

**A1:** for t = 1.5

**(d)** 

M1: for use of  $\mathbf{v} = \mathbf{u} + \mathbf{a}t$  for a general t

M1: for equating the i and j components of their v

**A1ft:** for t = 0.75, or a correct follow through answer from an incorrect equation

| Question | Scheme   | Marks | AOs       |
|----------|--|-------|-----------|
| 9(a)     | Take moments about A   |       |           |
|          | (or any other complete method to                               | M1    | 3.3       |
|          | produce an equation in $S$ , $W$ and $\alpha$ only)            |       |           |
|          | $Wa\cos\alpha + 7W2a\cos\alpha = S2a\sin\alpha$                | A1    | 1.1b      |
|          |  | A1    | 1.1b      |
|          | Use of $\tan \alpha = \frac{5}{2}$ to obtain S                 | M1    | 2.1       |
|          | S = 3W *   | A1*   | 2.2a      |
|          |  | (5)   |           |
| (b)      | R = 8W   | B1    | 3.4       |
|          | $F = \frac{1}{4} R (= 2W)$                                     | M1    | 3.4       |
|          | $P_{\text{MAX}} = 3W + F \text{ or } P_{\text{MIN}} = 3W - F$  | M1    | 3.4       |
|          | $P_{\text{MAX}} = 5W \text{ or } P_{\text{MIN}} = W$           | A1    | 1.1b      |
|          | $W \le P \le 5W$   | A1    | 2.5       |
|          |  | (5)   |           |
| (c)      | M(A) shows that the reaction on the ladder at $B$ is unchanged | M1    | 2.4       |
|          | also <i>R</i> increases (resolving vertically)                 | M1    | 2.4       |
|          | which increases max $F$ available                              | M1    | 2.4       |
|          |  | (3)   |           |
|          |  | (     | 13 marks) |

# **Question 9 continued**

### Notes:

(a)

1<sup>st</sup> M1: for producing an equation in S, W and  $\alpha$  only

1st A1: for an equation that is correct, or which has one error or omission

2<sup>nd</sup> A1: for a fully correct equation

**2<sup>nd</sup> M1:** for use of  $\tan \alpha = \frac{5}{2}$  to obtain S in terms of W only

 $3^{rd}$  A1\*: for given answer S = 3W correctly obtained

**(b)** 

**B1:** for R = 8W

1st M1: for use of  $F = \frac{1}{4} R$ 

**2<sup>nd</sup> M1:** for either P = (3W + their F) or P = (3W - their F)

 $1^{st}$  A1: for a correct max or min value for a correct range for P

 $2^{nd}$  A1: for a correct range for P

(c)

1st M1: for showing, by taking moments about A, that the reaction at B is unchanged by the builder's assistant standing on the bottom of the ladder

 $2^{nd}$  M1: for showing, by resolving vertically, that R increases as a result of the builder's assistant standing on the bottom of the ladder

 $3^{rd}$  M1: for concluding that this increases the limiting friction at A

| Question   | Scheme  | Marks | AOs      |
|------------|---|-------|----------|
| 10(a)      | Using the model and horizontal motion: $s = ut$   | M1    | 3.4      |
|            | $36 = Ut\cos\alpha$   | A1    | 1.1b     |
|            | Using the model and vertical motion: $s = ut + \frac{1}{2}at^2$   | M1    | 3.4      |
|            | $-18 = Ut\sin\alpha - \frac{1}{2}gt^2$  | A1    | 1.1b     |
|            | Correct strategy for solving the problem by setting up two equations in $t$ and $U$ and solving for $U$   | M1    | 3.1b     |
|            | U=15  | A1    | 1.1b     |
|            |   | (6)   |          |
| <b>(b)</b> | Using the model and horizontal motion: $U\cos\alpha$ (12)   | B1    | 3.4      |
|            | Using the model and vertical motion:<br>$v^2 = (U\sin\alpha)^2 + 2(-10)(-7.2)$  | M1    | 3.4      |
|            | v = 15  | A1    | 1.1b     |
|            | Correct strategy for solving the problem by finding the horizontal and vertical components of velocity and combining using Pythagoras: Speed = $\sqrt{(12^2 + 15^2)}$ | M1    | 3.1b     |
|            | $\sqrt{369} = 19 \text{ m s}^{-1} \text{ (2sf)}$  | A1 ft | 1.1b     |
|            |   | (5)   |          |
| (c)        | Possible improvement (see below in notes)   | B1    | 3.5c     |
|            | Possible improvement (see below in notes)   | B1    | 3.5c     |
|            |   | (2)   |          |
|            |   |       | 13 marks |

# **Question 10 continued**

### Notes:

(a)

1<sup>st</sup> M1: for use of s = ut horizontally

1<sup>st</sup> A1: for a correct equation

**2<sup>nd</sup> M1:** for use of  $s = ut + \frac{1}{2}at^2$  vertically

2<sup>nd</sup> A1: for a correct equation

3<sup>rd</sup> M1: for correct strategy (need both equations)

**2<sup>nd</sup> A1:** for U = 15

**(b)** 

**B1:** for  $U\cos\alpha$  used as horizontal velocity component

1<sup>st</sup> M1: for attempt to find vertical component

1st A1: for 15

2<sup>nd</sup> M1: for correct strategy (need both components)

2<sup>nd</sup> A1ft: for 19 m s<sup>-1</sup> (2sf) following through on incorrect component(s)

(c)

**B1, B1:** for any two of

e.g. Include air resistance in the model of the motion

e.g. Use a more accurate value for g in the model of the motion

e.g. Include wind effects in the model of the motion

e.g. Include the dimensions of the stone in the model of the motion
